Supply Chain Synergy Partners

Providing world class support to
engineering and manufacturing
companies across the globe.

IN PARTNERSHIP WITH

“DNAagile, with their experience and global perspective, have helped us gain a competitive edge through operational excellence...supporting good business practices which in turn strengthens our bottom line.”

Kim Gretschmann, Vice President, Operations
Standard Manufacturers Services, *Global Manufacturing Solutions*

How It Began

The partners each had a stake in the Competitive Edge Supplier Development program – a highly structured and systematic improvement system that has guided aerospace companies in Manitoba through strategically directed improvement activities. Manitoba Aerospace Human Resource Council was the program sponsor; DNAagile, a U.K. rising star, provided the Strategic Business Planning expertise and more.

Supply Chain Synergy Partners teams DNAagile with a new body on the horizon, Competitive Edge Supplier Development Services (CESD) Inc. to bring a galaxy of services to Canada:

- Strategic Advisory
- Supply Chain Development Solutions
- Competitive Solutions for Advanced Manufacturing and Engineering
- Mentoring and Training for Leadership Teams

Stellar Performance

For the past three years, DNAagile has been a star player in the Competitive Edge Supplier Development program within the Prairies aerospace sector. Companies in the CESD program have achieved stellar performance improvements.

SCSP Solutions

SCSP will customize your competitive solution through a thorough diagnosis of key business processes critical to strategic, operational or commercial differentiation.

Strategic Advisory

- Build strategic plans with a deployment system that will bring your plans right to the employees every day
- Coach and mentor your leadership team to drive and execute continuous improvement
- Build capacity for controlled organic growth supported by technology and knowledge transfer programs

Supply Chain Development

- Connect and synchronize demand in the supply chains to impact delivery and performance
- Build the potential to take advantage of aggregated procurement to lever improved prices and availability
- Build capacity to use informed Make versus Buy decisions to keep focused on core functions and reduce costs
- Learn to manage and maximize the “push-pull” of Sales and Operations Planning

Solutions for Advanced Manufacturing and Engineering

- Take advantage of innovative specialized software solutions including ERP, Performance Dashboards, and Knowledge Management Systems
- Provide strategic, tactical, and advisory services to improve operational efficiency and reduce costs
